VOL. 31, NO. 29 CAMPBELL, SANTA CLARA COUNTY, CALIFORNIA. FRIDAY, JANUARY 15, 1926

2.75 BEER BILL IS INTRODUCED

OTHER DRINKS OF THE SAME PERCENTAGE IN MEASURE

MRS. KAHN CALIFORNIA IS SPONSOR OF THE BILL

Newly Elected Ministerial Head Appeals for Modification of the Volstead Act and Flays "Criminal Army."

Washington.—A bill to permit manufacture and sale of 2.75 per cent alcoholic beverages was introduced by Mrs. Florence P. Kahn, Republican representative from California.

A committee hearing on 2.75 beer was forecast by Senator Edge, Republican, New Jersey, who said that Wayne B. Wheeler of the Anti-Saloon league would be given an opportunity to explain to a senate judiciary subcommittee "many extraordinary and startling situations." Senator Edge has a beer bill pending.

Mrs. Kahn, representative in congress from San Francisco, recently made public announcement of her stand against prohibition in its present form following hearings before a house committee of proponents of the dry law. She declared no one could listen to the stories of deceit practiced by prohibition workers to gain evidence and not be impressed by the futulity of the present statute.

Philadelphia.—The Rev. Dr. George W. Sandt, newly elected president of the Lutheran Ministerium of Pennsylvania, in a statement recently, urged modification of the law. Dr. Sandt said the eighteenth amendment "in the creation of the army of criminal bootleggers," had brought something "far worse than the saloon."

YOUTHFUL HEIRESS IS CALM OVER RICHES

Reigate, Surrey, England.—Jean Ferris, the 14-year-old girl who has come into a fortune of $4,000,000 by the termination of a trust fund of the estate of her grandfather, Claus Spreckels of San Francisco, is not greatly excited over her new riches.

Jean stated that she has no plans for changing her mode of life, but her stepfather, Arthur Hutton, with whom she lives in Nut Hill priory, expects there will be difficulties with suitors.

"Interest in Jean will come later," said Hutton, "especially from young men."

The legacy will necessitate Jean's living in the United States, Hutton said.

Jean is a thorough English girl in her manner, a great lover of outdoor life and fond of riding rather spirited horses bareback.

Cash Needed for Cattle Test

Washington.—Government efforts to eradicate tuberculosis from the cattle herds of the United States will probably be retarded instead of accelerated during the next fiscal year unless steps are taken immediately to increase the sum set aside in the budget for tuberculosis inspection of cattle. Last year's allowance for inspection work, which will be used up before July 1, the end of the fiscal year, was $3,500,000. In the budget for the next fiscal year this amount has been cut to $3,000,000. Officials of the department of agriculture said today that unless this amount was increased it would be necessary to curtail next year's activities.

Meeker's Life Saved by Brandy

Seattle.—Mayor E. J. Brown, in an interview, declared that he had saved the life of Eza Meeker, America's most famous pioneer, by supplying him with brandy when he lay critically ill two years ago. Instead of flying about the country in airplanes and being feted at nonagenarian banquets in New York, Meeker would be lying in his grave were it not for the mayor's gift of brandy, the city's chief executive asserted. "I suppose the fanatics would say that I should have withheld the brandy and allowed that grand old man to die," said Brown, feelingly.

Dog Found Guilty; Electrocuted

Pikeville, Ky.—"We, the jury, find the defendant guilty as charged," was the verdict returned by a jury in court here in the case of the state of Kentucky vs. Bill, a pretty pet collie, charged with being a dog of "vicious" character. The death sentence was imposed by County Judge J. W. Pruitt and "Bill" was legally electrocuted.

German Sets Steno Record

Essen, Germany.—Ullrich Bruhn established what is claimed to be a world's record for shorthand in a competition here recently, reading 810 syllables a minute.

RUBBER PRICE CALLED TIRE CONCERNS' ALIBI

Secretary Hoover's Activities Were Assailed on the House Floor by Representative Black, Democrat, of New York.

Washington.—The house committee investigating foreign monopolies in rubber and other raw materials interrupted its hearings recently to straighten out a mixup over what happened at an executive session held previous.

Aroused over publication of a story in a Washington newspaper which said Secretary Hoover had presented at the secret meeting a certain communication between the state department and foreign governments, the committee decided after some discussion to send a letter to Secretary Kellogg denying that any such documents had been presented.

The article got attention because of its assertion that the communications showed how foreign governments had "laughed at" the state department for trying to protect American consumers.

While the committee hearing was in progress Secretary Hoover's activities were assailed on the house floor by Representative Black, Democrat, of New York, as "propaganda plus" for the rubber interests.

"Here are the expanding tire companies," Black said, "sicking the faithful Hoover on the British lion just when they are about to inflate prices.

"They want an alibi to gouge the public, so they bark at the East Indian rubber planter, whose empire protects him better than the Napoleonic Sphinx of the White House, who campaigned on the back of a cow to protect our farmers."

Black asserted the price of crude rubber has little to do with the increase in tire prices, except to furnish "an excuse to our extortionists."

"A tire that cost $23 before restriction," he said, "and that had $2 worth of rubber in it, costs now $40, with $5 worth of rubber in it. Our committee will cry "Stop thief at the British while our own business leaders do their pilfering undisturbed."

He declared that the rubber inquiry was aimed at having Secretary Kellogg draw a bill of complaint in the world court against the British, adding:

"Then Great Britain will come into the world court with Sir Robert Horne with a complaint against the tariff. Then you can imagine who will get the judgment and how much it will be."

The first witness, A. L. Viles, general manager of the Rubber Association of America, said "the Stevenson plan" for control of production in the British colonial possessions was fundamentally unsound.

"This control is largely responsible for the advance in price," he said. "Restriction which nullifies operation of the law of supply and demand also renders ineffective any attempt to fix a fair price."

PLANS FOR BIGGEST AIRSHIP ARE COMPLETE

New York.—Completion of the designs for the largest metal-clad airship in the world, two and one-half times the size of the Shenandoah, to be built by the Aircraft Development corporation at the Ford airport, Dearborn, Mich, was announced by Carl F. Fritsche, general manager of the corporation.

Another smaller ship, one-tenth the size of the Shenandoah, also will be built, he said.

The larger airship will have a gas capacity of 5,000,000 cubic feet, and the smaller a capacity of 200,000 cubic feet. Both ships will be fireproof, lightning proof and weather proof, Fritsche said, none of which requirements are fulfilled by fabric lighter-than-air craft. The smaller will be used for demonstrations and experimental purposes.

Flyer Asks Damages for Fall

San Francisco.—Auggy Pedlar, professional aviator, who was injured in an airplane accident at Redwood City November 22, filed suit in the superior court for $26,441 damages from R. M. Sullivan, owner of the airplane in which Pedlar fell. Archie A. Young, Jr., member of one of the wealthiest families of Honolulu, was killed in the same accident. The suit is said to be the first ever filed in the local courts for damages arising from an airplane accident. Young was considering the purchase of the machine. Pedlar, according to the complaint, was hired by Sullivan to make a demonstration. The right upper wing collapsed.

Political Parties Amalgamate

Manila.—A conference of committees of the Nationalist and Democratic parties a short time ago signed a agreement providing for a coalition in the insular administration as a means of fighting for power and independence of the entire Philippines and against the attempts of congress to curtain autonomy.

Golden State
News of Interest to All

"It's a Privilege to Live in California."

The Redding, Shasta county, Methodist church has received a pipe organ that will be installed in the near future.

The Santa Monica Water company of Petaluma, Sonoma county, is negotiating to secure six thousand acres of land near Inverness.

Excavation has started for a 32-room hotel in Stockton, San Joaquin county. The proposed hotel building is to cost between $50,000 and $55,000.

Construction of a blooming mill at a cost of $280,000 as a new unit to the Columbia Steel company's plant in Pittsburg, Contra Costa county, was started recently.

The new postoffice building in Truckee, Nevada county, has been completed. The new building is a modern 2-story brick structure, costing approximately $10,000.

The Vallejo, Contra Costa county, city council has gone on record as favoring signing a contract for plans for the $80,000 city hall and branch county jail to be erected this year.

Sponsored by the Native Daughters of the Golden West, a women's band has been organized in Jackson, Amador county, and plans to give a number of concerts next summer.

The Oakdale irrigation district, in Stanislaus county, shows a gain of 20 per cent in the amount of land under irrigation over 1924, according to a crop census just completed by President H. S. Crowe.

An architect is preparing plans for a reinforced concrete grammar school building for the Sausalito grammar school district, to be erected at Sausalito, Marin county. The structure will cost about $60,000.

Mary B. Harrison of 2320 Seventeenth street, Sacramento, was the first Sacramentan to receive a set of the new 1926 blue and white auto license plates at the office of the motor vehicle department.

Judge William H. Waste was sworn in as chief justice of the California supreme court at a special ceremony in the courtroom in San Francisco. Supreme Justice Emmett Seawell administered the oath.

Law violators seem to be on the increase in Lodi, San Joaquin county. In 1923 there were 478 arrests, in 1924, 322, and in the year just closed 643, on which the city recorder assessed fines totaling $9,114.50.

Emanuel S. Heller, 61, vice-president of the Wells-Fargo Bank and Union Trust company, and one of the most prominent attorneys in the west, died at his home in San Francisco after an illness of two months.

A new plant, the cost yet undetermined, will be built in Modesto, Stanislaus county, soon by the Poultry Producers' Association of Central California, L. D. Thompson, manager of the local branch, has announced.

The Western Harvester company, a new subsidiary of the Caterpillar Tractor company, which opened the former Holt plant in Stockton, San Joaquin county, for operation, will reach normal manufacturing activities within thirty days.

Annexation of a rapidly growing section in the western part of the city of Stockton, San Joaquin county, is being considered by the West Side Improvement club. The territory in question is located in subdivision No. 2 of the Boggs tract.

Steps have been taken by State Surveyor General W. S. Kingsbury to exchange 50,000 acres of state school lands in federal forest reserves for a like amount of land in the reserves as a site for a state park in accordance with legislation enacted in 1923 and 1925.

For the first time in more than sixty years St. Patrick's Catholic church in Watsonville, Santa Cruz county, is out of debt, according to the Rev. Father P. J. McGrath, who is just completing his first year as pastor. In addition to wiping out the standing debt, the church has installed a pipe organ at a cost of $12,000.

California's oldest woman miner, one of the few miners, in fact, of her sex, is Mrs. Emma C. Mable, 79, of Brown Bear mine, near Deadwood, Trinity county. Mrs. Mable, an expert with the pick, shovel and drill despite her age, is working the famous gold producer of early days with her son, Curtis F. Mable.

Lodi's (San Joaquin county) postoffice passed the required $40,000 mark by $180.15 and thus gained her position in the list of first class postoffices, as is shown by the final checkup of the receipts for the year of 1925, which amounted to $2,548.34 more than the previous year, when the total was $37,631.81.

RECEPTION COMMITTEE APPOINTED FOR EVENT

S. N. Hedegard, president of the Chamber of Commerce has announced the following reception committee for Santa Clara County Old Settler's Day celebration at Campbell.

Executive Board Reception Committee—Mrs. E. R. Kennedy, C. H. Whitman, Ralston Alson, Mrs. D. H. Cramer, Guy Farley.

Reception Committee at large—Messrs. and Mesdames Ralston Alison, J. C. Ainsley, C. E. Berry, John D. Blaine, H. E. Brandenberg, L. J. Carboni, E. K. Clendenning, J. F. Duncan, R. E. Dunphy, G. M. Ellison, W. E. Eckles, G. E. Farley, F. C. Farr, W. H. Finnemore, John Hagelin, C. E. Hanger, L. Hyatt, A. F. Hills, H. C. Hutton, George E. Hyde, A. C. Keesling, Horace Keesling, R. W. Kennedy, L. T. Lennox, T. E. Marrs, Paul Marston, E. C. Merrill, C. B. Miracle, F. S. Newcomb, G. W. Page, Geo. C. Payne, J. J. Pardee, E. I. Price, F. M. Righter, T. A. Robinson, C. F. Rubell, W. S. Shelley, James Turner, W. H. Woodbury, H. S. Young, Mrs. M. E. Wade, Mrs. L. F. Shaw, Mrs. Ellen R. Smith, Mrs. L. M. Rodeck, and Joseph Bohnett, C. H. Whitman, and L. Woodward.

CAMPBELL CAGE TEAMS PLAY REDWOOD CITY

The Campbell 130 and unlimited basketball teams will play the Sequoia teams, Friday night, in the Campbell gymnasium. The Sequoia 130 lb. team has been conceded the championship of the P. A. L. having defeated every team to date. The Campbelll 130 l b.team are expected to give them a good fight.

The unlimited game will probably be in doubt until the end of the game. Both Campbell and Sequoai have veteran teams. To date Campbell has only lost one P. A. L. game and won three. The line-ups for the Campbell teams follow:

130		Unlimited
Gardner (c)	F	Fricano
Merrill	F	Reed (c)
Kosick	F	Clarke
Burns	F	Sundquist
Furtado	F	Hedegard
E. Nelson	C	Eddlemon
Robson	C	Nelson
Kosick	C	Cramer
Nelson	G	Kalas
Angelo	G	Shelley
Faria	G	
Lyndon	G	

The victory in the games which the two teams played Palo Alto went to that school, the unlimited by a close score 12 to 11, their winning basket being a long shot in the last two seconds of play. The other score was 22 to 8 which didn't leave any room for doubt. Morgan Hill won an easy victory in the game. Campbell played with them.

Gophers Celebrate

The Minnesota Association will hold a picnic dinner at San Jose Chamber of Commerce hall tomorrow, (Saturday) evening at 6:30. All former Minnesota residents are invited to attend. Bring basket lunch, dishes and silver. Coffee and ice-cream. President M. E. Purmort promises a good time to all. An old fashioned dancing party will be the finishing touch.

Buys Garage Share

J. Leonard Smith, who has been employed at the Orchard City Garage for some time, has purchased the interests of F. W. Gunter. Mr. Gunter has been compelled to sell his share of the business owing to ill heath. As Leonard has been there for some time, there will be no break in the handling of the work.

ORCHARD CITY GRANGE TALKS NEW QUARTERS

Orchard City Grange met Tuesday evening for the first time under it's newset of officers for the year 1926. They are Louis Shelley, Master; Harry Barnes, Overseer; Edna Keesling, Sec., F. S. Newcomb, Treas., S. N. Hedegard, Steward; Mr. and Mrs. L. L. Merrill, Asst. Stewards; Mary Fablinger, Lecturer; Mrs. Robert Parkhill, Chaplain.

The subject of a new grange hall was discussed and referred to a committee for investigation as to the feasibility of building.

Miss Fablinger, the new lecturer, instituted a novel program consisting of four prize talks by S. N. Hedegard, Mrs. Louis Shelley, Mrs. B. Dalvit and A. H. Harms. The judges, Jos. Bohnett, W. R. Coupland and W. H. Woodbury awarded the first prize to Mrs. Dalvit for her talk on "Just Men," and the booby to S. N. Hedegard for "grouches."

The standing Committees for the year follows:

Civic Improvements—Ida M. Clendening, George Whitney, A. G. Peterson, Mrs. Annie Hedegard, W. H. Woodbury.

Co-operation—E. K. Clendening, S. N. Hedegard, W. E. Rawlings, H. V. Archibald, Mrs. O. B. Couk.

Education—A. E. Rae, D. H. Cramer, Mrs. N. A. Galbraith, A. H. Wegel, W. H. Crothers.

Farm and Orchard—Stanley Smith, W. R. Coupland, Lee Hiatt, George Husted, Harry Barnes, L. L. Merrill.

Gardening—A. H. Harms, Joseph Bohnett, Laura Foster, E. B. Thrift, George Whitney.

Home Economics—H. C. Hagen, Mrs. Mary Parkhill, Florence Cramer, W. E. Rawlings, Ida Fisk.

Legislative—LeRoy Anderson, O. B. Couk, H. C. Hagen, Mrs. Jessie McChesney, A. S. Cooley.

Poultry—F. S. Newcomb, M. E. Purmort, Myrtle Arnott, Bob Mathieson, Marie Barnes.

Press—Horace G. Keesling.

Relief—The degree team.

MEET MR. HOLMES OUR NEW DRUGGIST

Mr. and Mrs. Victor Holmes have purchased the drug business and good good will of L. M. Beall, who has conducted the business for the past ten years.

Mr. Holmes has been in the pharmacy business almost eighteen years. He has just come from Mountain View and was at Long Beach for some time. Mr. and Mrs. Holmes came to California from Detroit, Mich., about two years ago and have been looking about the state for their hearts desire. The business, the climate, and the people here have proved a combination hard to beat. So here they are and a hearty welcome and wishes are extended our new townspeople. Mr. Beal has not been in best of condition for some time and will enjoy a well deserved rest. Mr. Beall and wife and Mrs. C. B. Evans have moved into the Mrs. Helen Dodge house next to the library and will continue their residence in Campbell.

MORELAND CLUB BACKS ROSE CANIVAL

Members of the Moreland Good Will Club and their families will enjoy a supper at their hall, the committee in charge being Mrs. A. V. McCarty, Mrs. John Boden and Mrs. L. E. Harriman.

The club is actively supporting the planting of roses and flowers for the county spring carnival. Several Paul's Scarlet climbers have been planted around the club house.

CAMPBELL CHAMBER PLANS FOR BUSY YEAR

The Chamber of Commerce meeting of the new year was opened Monday evening when President Hedegard, newly elected president, called the assembly to order.

In the absence of secretary G. E. Farley, H. C. Smth was appointed to serve pro tem. Several communications were read concerning certain publicity facts and these were on motion referred to the secretary for answering.

Dr. Merrill of the health commintee asked that all complaints of dumping refuse be reported to the local health officer that prompt action may be taken to abate such nuisances.

The subject of the rough railroad crossing came up for its annual discussion and was referred to the highway committee.

A proof of the new publicity folder was exhibited and the committee authorized to proceed.

After some discussion of the poor conditon of the roads west of town the highway committee was urged to get as early action as possible.

It was suggested that supervisors Martin and Cooley be invited to attend the annual Chamber of Commerce banquet.

The Chamber voted to hold its annual banquet Friday evening, Jan. 29th. C. H. Whitman, Rev. W. E. Eckles and R. Alison were appointed to make the arrangements for the preparation, place and program. These will be announced through the Press later.

C. H. Whitman introduced the subject of raising the dues which met with general favor. Following a discussion a constitutional amendment was proposed by T. A. Cutting setting the dues at $2.00 per year. This amendment will be voted on at the February meeting.

On motion the speaker committee for Old Settler's Day was granted $25 to defray expenses.

A committee consisting of J. F. Wehmeyer, Dr. W. I. Merrill and I. R. Abbott was appointed to secure county aid for Old Settler's Day celebration.

On motion the Chamber of Commerce was made sponsor for the Campbell Relief Committee one unit of the Community Chest. This committee is appointed by five organizations in Campbell each selectng its representative.

President announced the appointment of the following standing commtitees for the ensuing year:

Publicity

Mr. Harry C. Smith, Mrs. J. E. Wehmeyer, Mr. J. D. Blaine, Mrs. E. R. Kennedy, I. R. Abbott.

Public Improvement

B. O. Curry, J. F. Wehmeyer, Geo. Robson.

Finance

M. J. Bohnett, H. W. Norton, L. S. Miller.

Highways

Ralston Alison, C. H. Whitman, E. R. Kennedy, Geo. Hyde, Stanley Smith.

Public Health

Dr. W. I. Merrill, Dr. C. E. Farman, Mrs. Olga Weiss.

Commercial Committee

C. H. Whitman, C. B. Fields, Horace Lea.

Fire and Light District

T. A. Cutting, Wm. Mason, A. Gilson.

Beautification

Mrs. R. Alison, Mrs. E. R. Kennedy, Mrs. Charles Sutter, Mrs. M. Lanphear, Mrs. R. Hyde.

Special Com. & Sanitary Dist.

Dr. W. I. Merrill, E. K. Clendenning, W. S. Shelley, Oluf Strom, Dr. W. H. Crothers.

Mrs. Warren Shelly enjoyed a visit Sunday with her brother, Benjamin Call, of Tacoma, Wash. This was their first meeting in twenty-five years and they had a most enjoyable day which they hope to repeat soon.

Town Tales Tersely Told

Mr. and Mrs. J. W. Lancaster are in Oakland vsiiting their son Sidney and family.

Mrs. Ellen R. Smith entertained a few guests at luncheon Wednesday in honor of Mrs. L. B. Sprecher.

Mrs. Ellen R. Smith accompanied her son, Stewart, on a visit to her daughter, Mrs. Spaulding, leaving last evening by auto.

Mrs. Helen Dodge has rented her housse on Campbell Ave., to L. M. Beall and will have a room in the home of Miss Mary Fablinger.

G. E. Farley, our genial realtor an dsecretary is taking an enforced vacation from his desk as the result of the popular malady flu.

Wednesday was Supt. I. R. Abbott's birthday and the faculty of the grammar school gave a brithday dinner party in his honor, during the lunch hour.

A daughter was born Thursday morning to Mr. and Mrs. A. N. Lantz. Mrs. Lantz and the children have the flu, which makes a somewhat serious situation for "father."

A number of Campbell Club women visited the Saratoga Foot Hill Club Tuesday afternoon to hear Dr. David Starr Jordan, who spoke on Nationalism vs. Patriotism while answering a series of questions which had been previously submitted to him.

Mrs. Lawrence Neville and infant son, who have been here for several months with her mother, Mrs. J. N. Gardner, left Tuesday evening for Fort Wayne, Ind., to join her husband.

Mrs. J. W. Dolese and twins, accompanied her mother to Ashland, Oreg., yesterday. Mr. Dolese was assistant at the S. P. during Mr. Berry's absence, and now he is in the hospital where he will have to remain for some time.

The Whist party given under the auspices of We and Our neighbors club at the Club house Friday evening was a very pleasant affair. The club is raising money for a furnace and the proceeds of these parties goes into that fund.

Mr. P. Arnott went to Glendale Friday, where he is visiting Mr. and Mrs. Paul Darling and son. Miss Arnott had just returned from her sister so that "Dads" famous flock of hens is being properly looked after in his absence.

The Campbell Water Co. is laying four inch water mains on the south side of Rincon Ave., beyond the Mission Hatchery and subdivsions. At present the extreme west end will be two and a half inch pipe. Plans are underway to make improvements in other sections in the near future.

Mrs. D. L. Cockrill and children of Yosemite and Miss Cockrill of Oakland arrived last week to visit their sister an daunt, respectively, Mrs. W. E. Driesback. Part of them together with Mrs. Driesback and Leslie are ill with flu and and Mr. Driesback has his hands full as cook and nurse.

STRIKELESS OAKLAND FURNISHES OBJECT LESSON

There has not been a strike in Oakland, California since early in 1921, making practically five years of industrial peace. Capital and labor are on very peaceful terms.

During the eight years in preceding 1924 there were 8,081 strikes in the United States, resulting in a loss to employers of $478,600,969; to workers, 4,242,329,008 working days worth $1,704,403,522; and to the public, $10,303,188,865; a total loss amounting to $12,522,203,356, or an amount equal to $514 for every family in the United States.

During the year 1923 there were 700 strikes in the United States. Of this number 46 were in California, but none in Oakland or the East-bay district.

It is significant that during the past five years the Oakland territory has grown at a rate of unparalleled in its history. More than $150,000,000 worth of building construction has been carried on without a strike. It was during this peaceful period that the city witnessed its greatest industrial expansion. During 1925 more than 115 industries located in Oakland's industrial district; 105 in 1924, and 70 in 1923. It has today more national industrial organizations than any other Pacific Coast city. Peaceful labor conditions have been largely responsible for this tremendous factory expension.

THE GREAT HOME INFLUENCE

Two years ago there were few ready-made radio sets on the market. Today there are about 140, ranging from crystal receivers selling as low as $4.00 or $5.00, to the elaborate super-heterodynes, costing hundreds of dollars.

Mr. F. M. Steers, president of the Magnavox Co., says "Radio as a necessity for the home is recognized. A home without a receiving set will soon be rare indeed. The missing of broadcasts by day or night will be considered as serious an injury to the American people as failure to read newspapers, magazines and books. Manufacturers are spending large sums of money for research and experiments to perfect the receiving set and gain simplicity of operation. The great advancement of the single dials over the endless number of dials and other operating devices of the earlier sets, is an example of what has been done in radio engineering. It is now possible by a simple turn of one dial to get a station. This advancement is a wonderful advantage to people not blessed with eye sight, as well as those in out-of-the-way places where service and instruction are not available, as it enables them to operate their sets to the best advantage.

WHAT ARE WE SELLING?

What do we sell when we engage in a business transaction? Mere goods and service or only both? Are we selling honesty, cheerfulness, gratitude and kindness, as well as sugar, real estate, hats and gasoline? Boys and girls consciously and unconsciously absorb lessons from their elders. When dealing with youth, especial caution should be exercised to deal fairly. One shady deal may set a boy on the road to disgrance and failure; one unkind word may set a tingling a discordant strain in the mind of a young girl that will grow to unhealthful enormities in later life.

There are many stores that advertise themselves as institutions that cater to the young people and as places where boys and girls will be accorded the same treatment as grown-ups. If the managements of these stores carry out this principle they are contributing in no small measure to the welfare of their communities and to the well-being of future citizenship.

MUSSOLINI, THE AMBITIOUS

Benito Mussolin, Premier of Italy, has empirical notions and imperialistic ambitions, and wants to spread his doctrine of Fascism through the world or through as much of it as possible. Not many people know, and fewer care, just what Fascism is in its final analysis, except that it was orginally a system of government to oppose Bolshevism, which sounds all right as far as it goes. But the world is more interested in Mussolini, the man, than it is Fascism, the doctrine. Every person is endowed with the natural right to aspire to higher ideals; and assuming th t Fascism is bad for the world (whatever it may be for Italy), this powerful Latin statesman presents to the world a spectacle of misdirected energy. As head of a business institution he might become a force for production, or in the realms of human service become a mighty leader for social and spiritual welfare.

Celery is good for the nerves. So is salary.

A straight-from-the shoulder talk is all right if the shoulder isn't crooked.

The way to "take a paper" is not off the neighbor's front porch.

It's about time for some poet to write "The Passing Of The Sidewalk."

Investors Warned against Worthless Stock Promotions

This is the time of the year that plausible individuals begin taking an active interest in the other fellow's bank account. The "high pressure" gentry engaged in vending golden promises often succeed in persuading hard-earned-money from the pass books of the unwary. The less impetuous person consults with his banker before closing any financial undertakings with which he is not fully familiar.

Women Patrons Teach Storekeeper

ONCE, in an advertisement, I suggested the use of mayonnaise in fruit salad. "Don't you know better than that?" said a lady who is wise. "With fruit salad serve a dressing made for the purpose. I know a perfectly lovely recipe. I learned it from Mrs. A."

So this is the recipe that Mrs. A. gave to Mrs. K.:—

2 eggs
½ cup sugar
½ cup pineapple juice
¼ cup lemon juice

Cook the ingredients in double boiler until thick—but not until they separate.

When I inquired if we are to beat those eggs Mrs. K. looked at me as though she thought I belonged in Agnews. "But there is one thing more," she admonished, "in serving, blend with equal part of whipped cream."

Even now I'm afraid the story isn't told right, but I'm leaning heavily on the intelligence of my readers.

Ingram'a Chili Con Carne, the 18-cent size, is in stock again. It's pretty hot, and the weather's pretty cold, and the combination should be pretty good. Besides the 18-cent size, there's the large, which is special this week at 48c.

Our solicitation for your patronge is for your small needs as well as the large ones. No list too small for estimate to be cheerfully given. Carpenters procured if desired, and without any additional charge, either to build that garage, chicken house, or to make any needed repairs.

Coal Comfort

Governor Pinchot, at a Harrisburg reception, talked about the eternal coal mine troubles.

"You want me to be hopeful about these troubles, do you?" he said. "You want comfort? Very well. I'll comfort you—the way the old bachelor comforted the young bridegroom.

"'I was inveigled into matrimony by foul means,' said the young bridegroom. They told me two could live as cheap as one, but my wife's cigarettes and cosmetics alone eat up half my salary. Such extravagance!'

"'Ah, yes,' said the old bachelor in soothing tones, 'a wife, it is true, costs a great deal of money, but you must remember, my boy, that she lasts a very long time.'"

Rheumatic Cat

Little Alfred, age three, was visiting his next-door neighbors one day. He had expressed great interest in a large Angora cat owned by them. The cat did not prove to be very friendly or playful, however, and the neighbor woman told Alfred that poor Teddie had the rheumatism and did not feel well.

"My goodness," said Alfred, "is he going to have his teeth out?"

Charging that Willard D. Ellis, president of the Federal Farm Loan bank at Berkeley, is cloaking certain affairs of the bank with secrecy, that the federal farm loan system is fast assuming all the characteristics of a particularly autocratic bureaucracy and declaring that access to records has been denied, George H. Sawyer, recently re-elected a director of the bank, a short time ago issued a public statement exposing the alleged conditions. Sawyer, a farmer of Waterford, Stanislaus county, and former president of a bank, hints in his statement at a plot to wrest further control away from the farmers. Sawyer declared that although farmers own 84 per cent of the stock, they have little or no voice in the affairs of the bank at Berkeley.

Tennis balls at Smith's.

JAS. SMITH HIT BY SPEEDING AUTO

James E. Smith, a Campbell man, drivinga motor bus between San Francisco and San Jose, was hit by an auto Monday afternoon and sustained three fractures of the skull. He is now at O'Connor's sanitarium in a very criticial condition.

As he was removing grips from the rear of his bus for a passenger at the Sunnyside station a car driven by H. W. Kendall of San Francisco hit him. He was given first aid at Sunnyvale nad later moved to the hospital.

At last report he was still alive but in a very verious condition with little hope of his recovery.

He is the son of Mr. and Mrs. E. J. Smith of San Tomas road and had but recently attended the family reunion at their home. His home is now in Oakland.

Mrs. W. H. Stray received word Tuesday of the death of her sister, Mrs. Alice R. Gaines at the home of her daughter in Detroit, Mich. Mrs. Gaines spent several months here last winter and made many friends and acquaintances. Mrs. Stray is extended sincere sympathy in her sorrow

---

Great interest is being manifested in the oil well operations on the Lone Hill ranch. Machinery is all in place and the drilling is well underway. Many visitors were there last Sunday, machines lining both sides of the highway for some distance. A sandwich, hot dog and coffee stand in full operation and so far is the only "sure thing" in evidence. Ranchers in that vicinity are all waiting results with much in interest.

REV. MARSH WRITES FROM ATHENS SCHOOL

Mr. Harry Smith,
Campbell, California.

My Dear Mr. Smith:

I amvery glad indeed to be able at last to accept your invitation to write a letter to the Interurban Press.

There is a host of interesting things of which I should like to write you, but I will start with England, in which fair land we spent one of the most interesting three weeks of our lives. It was an utterly fascinating experience, and the farther we get away from it, the more interesting and significant it seems.

We landed in Liverpool on Sunday morning, Aug. 30th at ten o'clock. In an hour we were through the customs and comfortably settled in a small hotel, centrally located, to which we had been recommended. By 11 o'clock we were started for the great new Liverpool Cathedral, a few blocks away. It is built of a dark red stone, and though only half fineshed is impósing on the outside, rising as it does from a high hill overlooking the city and visible from the river Meuse up which you come to the docks.

But once I had entered the the noblest structures I had ever visited. The great wide arches towered 116 feet above us. The building is gothic, built with unusually wide arches to express the idea of the breadth of our modern life and thinking as well well as Man's eternal and universal aspiration for God. The choir and one pair of transcepts are finished. There yet remain to be biult a second pair of transcepts the great tower which is to be 350 feet high, and the nave. The portion already completed is superbly done with much fine but restrained carving. The large Lady's Chapel, the first part of thet Cathedarl to be finished ,is a gem, with its wealth of carving and stained glass windows. All the stained glass windows of the church are marvellous workmanship, portraying scenes in the life of Christ and of the Apostles, and great incidents in Church History.

We were much interested to learn that this vast Cathedral, destined to be one of the largest and most beautiful in the world, was designed by a young man in his early twenties; the son of Sir Gilbert Scott, a great English architect who has done so much English cathedrals during the of the work of restoring the old English cathedrals during the past fifty years.

It was immensely interesting to go about the big city of Liverpool, with its miles of docks and its low business blocks even in the most central part of the business district. But while English buildings are small compared with American, the thoroughness of so much in Great Britain is a large compensation.

Besides the Cathedral, the place in which we were most interested in Liverpool, was the Walker Art Gallery, where we were delighted to find the originals of some of the pictures we had long admired.

From Liverpool we went 20 miles through charming green English fields to the old town of Chester. Here we found ourselves at once in the realm of antiquity. The gateway of an old Roman wall stands squarely across the main street in the very center of town. A half mile from this gateway we stood on the same old wall with hundreds of others, and watched a most entertaining celebration of an English holiday in what looked like an American County Fair Grounds. The crowd and the sports also made us thnik of an American County Fair. It was on one of the towers of this same old Roman wall that King Charles the 1st stood and saw one of his armies defeated by the forces of Oliver Cromwell. But the central feature of thet town is a beautiful old Cathedral, only a block from our hotel. It is not so large as some, but most charming, some of its structure dating back to the 11th, 12th and 13th centuries. We could well believe the statement given us that the superb carving of the 13th century in the canopies over the choir stall was the most beautiful in England. The quaint carving all done with great care under the tiny seats of these choir stalls were immensely amusing, such scenes as that of a wife beating her husband and a patron saint bringing back to life a pet goose which had been killed by the cook, and the goose flying away.

But what impressed us much more even than the grandeur and charmof the seven English Cathedrals which we saw was the character of many of the Cathedral clergy whom we met, and their intense interest in the spiritual and social welfare of the people of their respective communities, and the way in which they are making these cathedrals serve vitally the present day needs of the people. Dean Dwelly of the Liverpool cathedral, for instance with whom we had a delightful conversation had a spiritual and social outlook which showed him to be a genuine leader of men in a new age.

From quaint old Chester we tore ourselves away most regretfully to go a third of the way across England through a lovely corner of Wales with its rolling greenhills, to Leamington, a most inviting small city, whence we travelled two, five and seven miles respectively to see three of the great spots in England.

First we went to Warwick Castle, one of the best preserved castles in England, noble in its great stone walls and charmingly situated above the little river Leam, an affluent of the historic Avon. Its still waters and wooded banks against the background of the great castle were a picture never to be forgotten, and I was delighted to find work the beautiful picture of the place which I had carried in my mind ever since I saw it at fifteen years of age seemed in no wise an exaggeration.

The next day we went to the ruins of Kennilworth Castle immortalized in Scott's novel of that name and the story was very much alive for us as we were shown the spot where according to the story Amy Robsart fell through a trap door to her death. In the mdist of that beautiful country it was easy to visualize the gay pageant which Scott portrays so vividly and with real historical accuracy.

It rained the day we went to Stratford, but even that fact could not dampen our joy as we wandered among the places connected with the life of the man who had penetrated more deeply into the mysteries of life and written more adequately about them that any other member of the English speaking race. The quaint house where he was born, the rambling old building where he went to school, and the little church among the trees beside the quiet Avon where he is buried. We were very fortunate to be there on the last day of the season when Shakespeare plays are given in the Memorial theater, nad to hear Julius Ceaser admirably presented by a group of local players. A we came out of the Theater the sun shining through a break in the clouds and we drove home through a world of shining green which will be a memory of loveliness as long as we live.

But I see that at this rate, this letter will be quite too long to be readable and I must leave the record of our wonderful days in Oxford, London and Canterbury for another letter. I do however wish to say something about our impressions of England as a whole. We were impressed with the fact that it is a small country with a very large population and that the people are making extraordinary use of small material resources. The post war conditions are extremely difficult, and the Government is making very great efforts to meet them adequately. There is a splendid spirit of courage and determination among the people, and with all a spirit of gaiety and good nature which arouses one's admiration. One of the most serious problems of the Government is suggested by the fact that it is supporting a million and a half of persons in idleness because there is no work for them. The great bulk of the people impress one as being very hard at work.

War will be what Sherman said without a proper air service.

Another evidence of the sophisticated age is Junior insisting upon balloon tires for his tricycle.

Doctor told Tulsa man to eat a light breakfast. Next morning the patient swallowed an electric lamp.

Save the Strawberries by Using Straw Mulch

"Wheat straw makes the best mulch for strawberries," declares James G. Moore, horticulturist at the University of Wisconsin. "Oat straw may be used as second preference but wheat straw is more apt to be free from weed seed.

"Ordinarily, it is best to wait until the first freeze before mulching so that the team and wagon do not cut up the bed. If the weather is such that there is no alternate freezing and thawing, the ground may be allowed to freeze several inches deep before mulching. Four inches of loose straw is about the right amount for this climate," concludes Moore.

Time of removing the mulch is determined by whether or not a person wishes an early or late berry crop. If the mulch is removed too soon, there is danger from frost. For a late crop the straw is left on until warm weather, or until the vines begin to grow. Leave as much straw on the vines as possible, advocates Moore, so the plants can get through. Some straw should be left between the rows, too, for a mulch. This aids the picking of the berries.

ORCHARD GLEANINGS

WOOLY APHIS IS PEST IN ORCHARD

The wooly apple-aphis is perhaps one of the worst pests of apple orchards, as it works mostly upon the roots, where it often escapes detection until the tree is badly injured or killed.

The aphids will be found clustered in bluish-white cottony masses looking like patches of mold, and around wounds or scars on the trunk or limbs. Their presence in these places is always an indication that others are feeding upon the roots where they cause gall-like swellings so that the roots often become a mass of knots and may die if the injury continues. When badly attacked, the tree becomes sickly, the foliage turns yellow and the tree may be killed.

On an infested tree, aphids may be found on the roots in all stages in the spring. Some may be found on the trunk under loose bark or the dead bodies of those killed the previous fall. As the buds begin to open, the aphids on the trunk locate on tender new bark and commence feeding and many migrate from the roots to the top at about the same time.

Tobacco dust in trenches around the tree will kill many of the aphids and act as a repellant. The aphids may be destroyed on the limbs and trunk by spraying with 7 per cent kerosene emulsion; with a miscible oil 1 gallon to 30 or 40 gallons of water; whale-oil soap, 1 pound to 1 gallons of water, or with "black leaf 40," or other equally good nicotine sulphate, 1 part in 700 parts of water. Whatever insecticide is used, it must be applied in a strong spray so as to wet thoroughly and penetrate the waxy covering of the aphids.

Root treatments are of rather doubtful value. Good orchard practice to keep the trees in a strong, healthy condition is always important. —W. P. Yetter, Jr., Deputy State Entomologist, Colorado Agricultural College.

Brazil Growing Rich on Growth of Rubber

The efforts of the United States government to increase the volume and the rapidity in shipments of crude rubber from the Middle East are being wathed with trepidation by Brazilian producers, who are naturally heartily in favor of a stand-pat attitude with regard to the limitation of rubber, on the part of the British government. They want to retain the temporary advantage given them by this restriction. One large Brazilian state (Manaos) has already nearly paid a debt under which it has staggered for years from the proceeds of the rubber boom.

The general attitude of Amazon rubber men is one of getting out of it all they can at once because of the probability that the high prices will not continue.

Coffee, cocoa and rubber have been the principal factors in the recent rise of the Brazilian milreis in exchange. The effect of the sharp increase in the price of rubber has so far hardly been felt, because very little exportation of that product has actually taken place. When shipments of rubber begin this product will become an important factor in exchange.—Detroit Free Press

Golden State
News of Interest to All

Nicholas Quirola, whose romantic efforts to reach California in the days of the gold rush read like a piece of melodramatic fiction, is dead in Auburn, Placer county, at the age of 91 years. He left no known relatives, so it is a puzzle as to who will get his estate amounting possibly to $25,000. Quirola was a native of Italy and was living in that county when the news came that gold had been discovered in California. He made his way to Naples, where he succeeded in stowing himself away on an outbound steamer. Arriving in New York, he succeeded in getting a job before the mast on a sailing ship bound for California around the Horn, reaching San Francisco in the fall of 1850.

Plans for the expansion of the Stockton Graham Brothers assembling plant was discussed in Detroit on January 6 between officials of the company and Robert A. Houston, plant superintendent, who is now in that city. Tentative plans for four new units, each costing approximately $50,000, have been prepared. It was planned to proceed with two of these units prior to the recent merger of the Dodge and Graham Brothers interests, but Houston now believes that authorization may be given for the construction of all four units. The addition of these units would add about 250 employees to the payroll of the company in Stockton.

A building revival in Visilia, Tulare county, has been noted for the past three months of 1925, as compared with the other nine months of the year, and would appear to indicate the approach of conditions much nearer normal than for some time. Building permits for the past three months in Visalia represented 40 per cent of the year's total, which exceeded $50,000.

An agreement for the purchase of 148 acres of the Jackson tract south of Yuba City, Sutter county, by Henry Kleinsorge and John K. Granacher from J. Allen Jackson for the sum of $52,000 has been filed for record in the office of County Recorder Flaney. The tract is orchard land, lying between the old levee and Feather river. All is reclaimed bottom land.

Every year California produces raw by-products of milk worth $1,000,000, according to Dr. J. J. Frey, bureau of dairy control, state department of agriculture, at Sacramento. After these raw materials, mostly dried casein, come into the hands of manufacturers, they are made into articles for which the consumer probably pays in the neighborhood of $10,000,000.

Arthur C. Mason, government entomologist of Lindsay, Tulare county, his wife and son, left recently for San Francisco, whence they will sail for Honolulu, where Mason will undertake a new commission for the United States department of agriculture. Mason has been studying the life history of citrus thrips and recently completed this work.

The continued lack of rain in California has retarded the buying of feeder cattle, due to the lack of grass, according to the California Cattlemen's association. The demand for feeders has been good, but unless heavy rains occur during the month of January, the supply of cattle on grass will be less than normal.

State Controller Ray L. Riley recently reported that the semi-annual settlement of counties with the state totaled $4,524,637.49, about $200,000 in excess of the preliminary estimates. Of the total $3,988,219.23 represented inheritance taxes collected by the counties for the state during the six months ending in December.

Plans have been completed for calling a special election in Porterville, Tulare county, February 2 for the purpose of choosing fifteen freeholders to draw up a charter form of government.

Horticultural News

IT PAYS TO SPRAY AND PRUNE APPLES

It pays to spray and prune all apple trees every year. All weak, dead or disensed limbs should be removed in addition to the ones that are taken out to give the desired form. Then the following spray program should be followed: At some time during the dormant season either in the fall or early spring apply lime-sulphur, 6 gallons to 50 gallons of water which will test 5 degrees Baume. In the spring just after the leaf buds burst but before the blossoms open spray with 1¼ gallons of lime-sulphur and 1½ pounds of arsenate of lead to 50 gallons of water. If plant lice are present at this time add ½ pint of nicotine sulphate to each 50 gallons of spray. If continuous cool, damp weather prevails make this application when the first leaves are expanding but before the blossom bud leaves begin to separate. The next four sprays should consist of the same materials as the second spray and should be made according to the following rules: The third spray should be applied just after the petals have fallen but before the calyx lobes have closed. The fourth spray should be given from two to three weeks after petals fall. If blotch is present this spray should be made within at least two weeks after petals fall. If the blotch is very severe use bordeaux mixture 2-4-50 instead of the lime-sulphur and make two additional applications at two-week intervals. The fifth spray should be applied about the second week in July, depending upon the locality and the presence of the codling moth. It is best to consult the county agent about the time of this spray. Bordeaux mixture should also be substituted for this spray if the temperature is extremely high or if bitter rot is present. The last spray should be applied about three or four weeks after fifth spray or about from 10 to 12 weeks after the petals fall. All of these sprays should be applied thoroughly, taking care that the material reaches all parts of the tree and it is important that the spray should be very near the correct strength and put on the trees at the time when it will be most effective.

Spraying for San Jose Scale Is Proper Plan

The San Jose scale is again making serious inroads into orchards, according to the entomologists of the state agricultural experiment station at Geneva. The great activity of nurserymen and orchardists in combating the scale several years ago practically eliminated the pest as a menace to fruit growing in New York. Lately, however, vigilance has been relaxed to the extent that the scale is again becoming a serious problem in many orchards.

Fruit growers everywhere are urged by the station officials to be on the lookout for badly infested trees as a menace to fruit growing in New York. Lately, however, vigilance has been relaxed to the extent that the scale is again becoming a serious problem in many orchards.

Fhuit growers everywhere are urged by the station officials to be on the lookout for badly infested trees as they prune their orchards. The twigs and small branches of severely infested trees have a grayish, scurvy look which may extend even to the main branches. By marking such trees special attention can be given to them when the spraying is done later on.

Spraying with lime-sulphur at a strength of one part lime-sulphur to eight parts of water early in the spring just as the buds began to swell will hold the scale in check, it is said. Trees which have been marked as having a heavy infestation should receive extra careful spraying in the spring.

Mulching Strawberries Is of Much Importance

A great many strawberry growers neglect to provide winter protection for the strawberry patch. Straw is the best material to use and it should be applied after the ground is frozen. Any time in late November or early December will do. The object of mulching is not to prevent the ground from freezing, but to keep it from alternate freezing and thawing, which so often causes a heaving of the plants.

The mulching should be left on until spring, when there is indication that growth will start. It should not be left on longer than that, otherwise the plants may smother out. The advisable thing to do is to rake the mulching material from off the plants onto the ground between the rows, where it should be left until after fruiting time for the purpose of conserving moisture and keeping the ripening fruit free from dirt.

Protect Strawberries

If strawberry plants are thoroughly cultivated and fertilized in the fall and mulched heavily with partly decomposed straw or leaves, the moisture will be conserved and the plants will suffer little even during a protracted drought. This is essential because the strawberry crop is nearly always injured by a drought occurring just about the time the berries begin to ripen, states C. C. Newman, chief of the horticulture division at Clemson college.

NOTICE TO CREDITORS

Estatate of Samuel George Rodeck, Deceased.

Notice is hereby given by the undersigned Executrix of the last Will and Testament of Samuel George Rodeck, deceased, to the creditors of and all persons having claims against the said decedent, to file them, with the necessary vouchers, in the office of the Clerk of the Superior Court in and for Santa Clara County, California, within ten (10) months after the first publication of this Notice, or within said period to exhibit the same, with the necessary vouchers, to the said Executrix, at the office of Bohnett, Hill & Campbell, Rooms 311-314 Bank of San Jose Building, in the City of San Jose, County of Santa Clara, State of California, where all business connected with said estate will be transacted.

San Jose, Cal., this 11th day of December, A. D. 1925.

Horticulture Facts

Continue to spray potatoes, celery and fall strawberries until they are ready for harvest. Cultivation around small fruits should cease.

* * *

Bitter rot of apples may be controlled by liberal applications of bordeaux mixture, applied in a mistlike spray. In orchards particularly severely infected it may be necessary to spray with bordeaux about forty days after the petals have fallen and make three additional applications of bordeaux at intervals of two weeks.

* * *

Black rot disease of grapes shows up on the leaves as nearly circular, brown spots which are sharply defined. Bordeaux mixture is the control. The first spray should be applied just as the buds are swelling in the early spring. The next application should be made as the buds unfold, and afterward spray the vines about every two weeks until five or six applications have been made.

* * *

High yields require good stands and good stands may be best secured with good seed. Even better seed must be of an adapted variety if maximum yields are expected.

* * *

Just what crop to use as an orchard covering depends upon local circumstances. It is believed that oats sown about the first of August make the best cover crop for the farm orchard. The cover crop must germinate well and make heavy growth during the fall and also stand up sufficiently to hold the leaves and snow.

Famous Dog Dead

Bristol, the famous St. Bernard watchdog of the League of Nations headquarters at Geneva, is dead. He was washed specially for the sixth assembly, and it is thought he must have caught a cold. The next day he was suffering pain, and a dose of opium was injected, death taking place at once. Bristol—whence he got the name is not known—was about fifteen years old, and originally belonged to an Italian count, who was a resident in the Hotel National before it was taken over by the league. The St. Bernard had been a watchdog since the foundation of the league, and was probably the most familiar figure there. All day the delegates at the assembly, and many others, were inquiring as to the state of his health.

Insurance of Yield and Quality of Strawberry

Keeping this year's setting of strawberry plants free from weeds, and maintaining the soil in good condition right up to freezing weather in the fall is good insurance of yield and quality of fruit in 1926, the fruit men at Cornell college say. It may be necessary, further, to do more or less hand hoeing in addition to horse cultivation to maintain the vigor of the new-forming plants.

When the ground is frozen sufficiently to prevent the wheels of a wagon from cutting through, the strawberry bed may be mulched. This will not only reduce, if not entirely prevent, winter injury from severe cold, but it will help prevent loss from heaving of the plants during the freezing and thawing weather in the early spring.

More injury from heaving takes place on the heavier types of soil than on the lighter sandy or gravelly loams; however, mulching is advisable wherever it is possible to obtain coarse manure or straw for this purpose, the college maintains.
